

The Bar-Guard™

Testimonial

Hello Bob,

Thanks for replying so promptly.

Well I guess you're half right but I don't ride motorbikes but I qualify as vintage.

As I said earlier I purchased mine through Bursons.

The thing that attracted me most was the design of the guards and material you've used.

My father-in-law (now deceased) was riddled with the dancer and as the disease bit harder he found if he knocker himself the skin would peel off and it took a long time and a lot of work for the wound to heal.

He was totally wrapped in the guard as his biggest fear was to walk behind the car and bark his leg.

(He had skinned his shins numerous times when removing groceries from the boot of the car and after installing the guard no more tears from barked shins.)

Although I'm a lot younger than him, I can assure you the guard has saved me a lot of tears and pain over the last few years.

As a suggestion, maybe you could demonstrate you guard to the Cancer Council and they could pass the information about your product to their clients.

I suggest the Department of Veterans Affairs may also appreciate the knowledge of your product.

From what I've seen out in the market place the alternatives are useless and I'm stuffed if they would stop you from loosing skin or a severe bruising, plus they are in the same price range as you guard.

I'll certainly place an order next week.

Bye for now

Ray L
